The ALIVE National Centre Model for Mental Health Ecosystem Change

Our Focus:	lf we:	This will result in:
Prevention across the life course	Implement preventive interventions in community settings to address structural, contextual and individual risk factors.	Increased emotional, social, community capacity for better mental health and well-being
	Develop tailored models of	Holistic care that brings
Longer, Healthier Lives	care that address unmet physical health needs with people living with severe mental ill-health for implementation	physical and mental health together
Priority Populations	Implement Aboriginal and Torres Strait Islander community-led innovations that change service cultures, improve access, and reduce stigma and discrimination	Improved quality in the workforce to respond to the impacts of social determinants of health
Lived-	Embed lived-experience in the fabric of research and	Lived-experience informed translational research
Experience	systems transformation	
Capacity Building	Grow national networks for capacity building, data sharing, and	Tailored training, mentorship, career pathways increased capabilities
	support implementation and translation	Implementation of evidence-based models of care and community-led innovations
Mental Health Care At Scale	Co-design a roadmap for national mental health research translation	Centre influence on policy, research implementation with service sectors, funding

Research Translation

Strengthened environments that protect and promote mental health

Improved experiences of care, better outlooks and health outcomes

Embedded cultural security, delivery of appropriate care and system responsiveness

Future mental health research leaders across disciplines

Lived-experience led research and leadership in the mental health research and workforce sectors

Reduced duplication in research, data, services and funding

Service integration and cost effectiveness

Reduction in the risks of mental ill-health across all ages

Increased service identification, access to services and economic benefits

Integrated lived-experience knowledge and expertise in research translation and systems change

> A regenerated mental health ecosystem using co-design

And contribute to:

Our Vision

Vibrant communities that support mental health and promote well-being and enable people to thrive

Our Mission

Transforming mental health and well-being through primary care and community action
